

Study fuels and fire effects after single-tree selection in redwood stands (six sites on JDSF – see map)

Retention: 120-180 ft²/ac

Expt'l fuels treatments (see diagram below)

Treat fuels 6-10 years post-harvest

Timeline

2022/3: Sample plots, fuel transects

Fall 2023: Prep fuels (i.e., masticate or lop+scatter)

Fall 2024: Rx burning
